- 2. Peripherals**
- 3. Modern Accessories**

SUMMARY OF OUR INDUSTRY

The India Mobile Accessories market is anticipated to register an impressive CAGR during the forecast period. The market is driven by the increasing number of smartphone users, rising internet penetration, and product innovation.

India has more than 1.2 billion mobile phone users and 600 million smartphone users as of 2022, according to the Ministry of Information and Broadcasting. Smartphones' rapid technical advancement in the twenty- first century has led to their widespread use as a utility for routine chores such as alarms, task reminders, remote appliance control, and others. Additionally, applications that explore entertainment and media functionalities such as big touch displays, speakers, simple volume controls, voice control, and other features offer value to the market. As a result, to a significant extent, smartphones have replaced laptops, cameras, wristwatches, and other equipment.

Additionally, features such as handsfree and others create a demand for headsets and headphones, pushing the user to purchase these mobile accessories. The brittle design and screen of mobile phones also encourage customers to buy screen protectors and protective cases. To attract customers, these protective items are produced with attention to both design and quality. As a result, the market for mobile phone accessories is also growing as smartphone adoption rises.

INTERNAL RISK FACTORS

- 1. We rely on a limited number of third-party suppliers for some of our key components, raw materials, services and products. Any shortage and cessation in supply from these suppliers could adversely affect our business, cash flows and results of operations.***

We purchase a substantial portion of our materials and components from a limited set of suppliers. A majority of critical components, such as chipsets are sourced from a single source to get the benefits of, amongst other things, price, design effort, inventory, supply chain and after sales efficiency. List of our suppliers for F.Y. 2022-23 and 2021-22 is given as follows:

(Amount in Rs.)

S. No.	Particulars	F.Y. 2022-23	%	F.Y. 2021-22	%	F.Y. 2020-21
1	Creaton Corporation Private Limited	99,28,71,728	40.03%	9,40,94,488	8.07%	-
2	Staunch Electronics India LLP	8,23,29,158	3.32%	1,15,72,090	0.99%	-

	Total	1,41,52,71,557	57.06%	1,11,47,50,604	95.60%	-

Although we believe we have maintained stable relationships with these suppliers, we cannot assure you that we would be able to source raw materials from alternative sources, at acceptable prices or at all, in the event we could not obtain such materials from our existing suppliers in an adequate quantity and timely manner for any reason and of good quality. We cannot assure you that shortages will not occur in the future, particularly in the case of our growing sales of handsets as an increasing proportion of our handsets incorporate components using newly introduced technologies. Any failure to obtain raw materials or components could interfere with our operations and cause our competitive positioning to suffer. In case of issues affecting a product's safety or regulatory compliance, we may be subject to damages due to product liability, and defective products or components may need to be replaced or recalled which will also adversely affect our brand and reputation.

Our ability to source components efficiently and on terms favourable to us could also be adversely affected if component suppliers who also operate in the mobile products market choose to limit or cease the supply of components to other mobile device manufacturers, including us. In the event of an increase in the cost of our production, we cannot assure you that we will be able to correspondingly increase the price of our products due to competitive pricing.

We provide our after sales services through third party contractors. For providing such third party services, we have entered into contracts with such third party services providers. Although we believe we have maintained stable relationships with these services providers, we cannot assure you that we would be able to source quality service providers, at acceptable prices or at all, in the event we could not obtain services with existing suppliers or in the event of increase in number of locations for providing services. We depend on their expertise and rely on them to provide satisfactory levels of service. After-sales services, such as technical support and repair, are essential in order to maintain customer satisfaction with our products and create positive brand reputation. If these third-party providers fail to provide consistent quality service in a timely manner and sustain customer satisfaction, our operations and revenues could suffer.

2. *We face competition, including from other large and established competitors, and we may fail to compete successfully against existing or new competitors, which may reduce the demand for our products and services which may lead to reduced prices, operating margins, profits and further result in loss of market share.*

We face increasing competition from other mobile handset designers and manufacturers and distributors for our feature phones as well as our smart phones. Many of our existing and potential competitors in India and in overseas markets may have substantially greater brand recognition, longer operating histories, greater financial, research and technological resources, product development, sales, marketing, more experienced management, access to a cheaper cost of capital and other resources than we do. Some of our competitors may have lower costs, or be able to offer lower prices and a larger variety of products in order to gain market share. Our competitors may also make acquisitions or establish cooperative or other strategic relationships, among themselves or with third parties, including dealers and distributors of our products or developers of operating software platforms, thereby increasing their ability to address the needs of our targeted customers and offering lower cost products and services than we do which may have a negative effect on our sales. Further, new competitors may emerge at any time. Our competitors may be able to offer better terms to third-party original equipment manufacturers ("OEMs") or service providers. In addition, they may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete.

3. *If we fail to successfully identify and respond to changing customer preferences and demands in a cost effective and timely manner, our ability to generate revenues and grow our business may be adversely impacted.*

The market for the product categories that we offer is characterized by rapidly changing technology, evolving industry standards, changing consumer preferences and demand for features, and constant product innovation. Our success depends on our ability to anticipate, gauge and react to change in customer tastes for our products, as well as to where and how customers shop for these products, technological developments, enhance existing products and technology, develop new products and technologies and bring these products to the market in a timely and cost-effective manner as well as operate within substantial production and delivery constraints.

Customer preferences in the markets we operate in are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. While we strive to offer our customers products that are value for money, there is no certainty that such products would be continued to be preferred by our customers over more expensive substitutes.

We continually work to stock new product categories and products, maintain and enhance the recognition of our brands, achieve a favourable mix of products, and refine our approach as to how and where we market and sell our products. While we try to introduce new products or variants, we recognize that customer tastes cannot be predicted with certainty and can change rapidly, and that there is no certainty that these will be commercially viable or effective or accepted by our customers.

In order to develop and introduce new products and enhancements, we may need to incur significant research and development costs, obtain and evaluate feedback from our customers and distributors and analyze customer usage patterns. If we fail to accurately anticipate technological trends or our end users' needs and preferences, or if we are unable to respond timely to such trends by developing and offering cost effective, reliable and user-friendly products, our ability to retain our current, as well as attract new, customers may be impaired, and our ability to generate revenues and grow our business may suffer and may in turn loss our market share. While we may be able to complete the development of new products and services in a cost-effective and timely manner, they may not gain traction in the market at all, or at anticipated levels, which may adversely affect consumer acceptance of our products and thereby lower our sales and gross margins. Any of these factors could have an adverse effect on our business and results of operations.

4. If our products become obsolete due to a breakthrough in the development of technology or alternate products, our business, results of operations, financial condition and cash flows may be adversely affected.

In the event of a breakthrough in the development or growing popularity of alternate technology, we may be exposed to the risk of our products becoming obsolete or being substituted by these alternatives, and any failure on our part to effectively address such situations or to introduce new products could adversely affect our business, results of operations, financial condition and cash flows. Further, if our competitors are better positioned to respond to new or emerging technologies and are consequently able to reduce prices, we may be faced with a loss of market share.

In particular, if we fail to adapt to the rapidly changing technological development characterized by the introduction of high-speed wireless technology or fail to upgrade or adapt our existing products, our products may become less attractive to customers. This could limit our ability to acquire new customers and cause us to lose existing customers to competitors, which could have an adverse effect on our business, financial condition and results of operations. For example, our sales of phones contributed to approximately 68.26% and 46.76% of our total income for the financial years 2023 and 2022 respectively.

Our sales of feature phones may reduce over time due to advancements in wireless telecommunication infrastructure in India, such as the rollout of 5G networks, and the growing popularity of 5G enabled handsets. To respond successfully to technological advances, we may require substantial capital expenditures and access to related or enabling technologies in order to integrate the new technology with our existing technology. We rely on the Android operating system, which we build into our smartphones and use for our customized user interfaces. There can be no assurance that existing, proposed or as yet undeveloped operating systems may become dominant in the future and render the Android OS less profitable or obsolete and lead to significant writedowns, or that we will be successful in responding in a timely and cost-effective way to keep pace with such a development.

5. *We rely on a limited number of manufacturers for manufacturing of our products. Any delay or inability to renew or maintain standards as per BIS may lead to cancellation or revocation of licence by competent authority.*

We do not have in-house manufacturing facility and rely completely on third-party manufacturers for manufacturing of our products. They manufacture products as per our specifications and standards. They hold a valid certification from Bureau of Indian Standards (BIS), which presumably signifies that they meet the required quality and safety standards set by the regulatory body. In case of cancellation or non-renewal of these certificates, it could have significant implications in our business such as our business reputation, legal and regulatory compliances potentially resulting in fines, penalties, or legal actions.

In addition to this, finding a reliable and certified manufacturing partner can be challenging, and could lead to disruptions in your supply chain and also raise questions about the long-term viability of your current supply chain strategy.

Our inability to effectively respond to any cancellation or rectification, in a timely manner and at an acceptable cost, could result in us being unable to satisfy our contractual commitments, which could have an adverse effect on our business, financial condition and results of operations.

6. *Our sales and profitability could be harmed if we are unable to maintain and further build our brands.*

We believe brand is one of the key factors in sale of our feature phones and smartphones and believe that our future success may be influenced by the performance of our "Cellecor" brand, as well as our ability to communicate effectively about our products to our distributors and with our target customers through consistent and focused marketing messages. A number of factors, including adverse publicity regarding our brand ambassadors and unsuccessful product introductions, may have a negative effect on our reputation and erode our brand image. Insufficient investments in marketing and advertisements towards brand building could also erode or impede the development of our brand. Although we had spent ₹497.52 Lakhs and ₹15.70 Lakhs towards advertisement and publicity during the financial years 2023 and 2022, or 1.88% and 0.13% of our total income in such periods, respectively and continue to expend resources on establishing and maintaining our brands, no assurance can be given that our brands will be effective in attracting and growing our customer base or that such efforts will be successful and cost-effective. Any impairment of our reputation or erosion of our brand or failure to optimize our brand in the marketing of our products could have an adverse effect on our ability to retain our current customers and attract new customers and therefore, on our sales and profitability.

7. *We rely on a limited number of third-party suppliers for some of our key components, raw materials, services and products. Any shortage and cessation in supply from these suppliers could adversely affect our business, cash flows and results of operations.*

We purchase a substantial portion of our materials and components from a limited set of suppliers. A majority of critical components, such as chipsets are sourced from a single source to get the benefits of, amongst other things, price, design effort, inventory, supply chain and after sales efficiency. Although we believe we have maintained stable relationships with these suppliers, we cannot assure you that we would be able to source raw materials from alternative sources, at acceptable prices or at all, in the event we could not obtain such materials from our existing suppliers in an adequate quantity and timely manner for any reason and of good quality. We cannot assure you that shortages will not occur in the future, particularly in the case of our growing sales of handsets as an increasing proportion of our handsets incorporate components using newly introduced technologies. Any failure to obtain raw materials or components could interfere with our operations and cause our competitive positioning to suffer. In case of issues affecting a product's safety or regulatory compliance, we may be subject to damages due to product liability, and defective products or components may need to be replaced or recalled which will also adversely affect our brand and reputation.

Our ability to source components efficiently and on terms favourable to us could also be adversely affected if component suppliers who also operate in the mobile products market choose to limit or cease the supply of components to other mobile device manufacturers, including us. In the event of an increase in the cost of our

production, we cannot assure you that we will be able to correspondingly increase the price of our products due to competitive pricing.

We provide our after sales services through third party contractors. For providing such third party services, we have entered into contracts with such third party services providers. Although we believe we have maintained stable relationships with these services providers, we cannot assure you that we would be able to source quality service providers, at acceptable prices or at all, in the event we could not obtain services with existing suppliers or in the event of increase in number of locations for providing services. We depend on their expertise and rely on them to provide satisfactory levels of service. After-sales services, such as technical support and repair, are essential in order to maintain customer satisfaction with our products and create positive brand reputation. If these third-party providers fail to provide consistent quality service in a timely manner and sustain customer satisfaction, our operations and revenues could suffer.

8. *If we do not accurately forecast demand for our products, our revenues, profit and cash flows could be adversely impacted.*

The demand for our products depends on many factors, including pricing and channel inventory levels, and is difficult to forecast due in part to variations in economic conditions, changes in customer preferences, relatively short product life cycles, changes in competition, seasonality and reliance on key sales channel partners. It is particularly difficult to forecast demand of an individual product. Significant unanticipated fluctuations in demand, the timing and disclosure of new product releases or the timing of key sales orders could result in costly excess production or inventories, liabilities for failure to achieve minimum purchase commitments or the inability to secure sufficient, cost-effective quantities of our products or production materials. Any such development could adversely impact our revenues, profit and cash flows.

9. *Our company's financial performance and growth are heavily dependent on a particular mode of sales, namely direct distribution, which constitutes 96.74% for FY 2023 and 99.63% for FY 2022.*

Our company's financial performance and growth are heavily dependent on a particular mode of sales, namely direct distribution, which constitutes 96.74% for FY 2023 and 99.63% for FY 2022. The bifurcation of which is given below:

(Amt in lakhs)

S. No	Mode of sales	FY 2023 (Audited)	%	FY 2022 (Audited)	%	FY 2021 (Audited)	%
1	Direct Distributor	25,572.51	96.74	12,084.46	99.63	-	-
2	Online/e-commerce platforms like Amazon, Flipkart etc.	862.69	3.26	44.52	0.37	-	-
3	Through our own website www.cellecor.com **	-	-	-	-	-	-
Total (Amount and percentage)		26,435.20	100.00	12,128.98	100.00	-	-

**Note: The revenue from own website as stated above was derived starting from 1st April 2023 onwards.

This concentrated reliance exposes us to significant operational and financial risks that could adversely affect our business operations and results. Depending solely on one sales channel can leave us vulnerable to sudden shifts in market dynamics, consumer preferences, or changes in the competitive landscape. If this channel experiences a decline in demand or becomes less effective due to external factors, our revenue and profitability could be severely impacted.

Overreliance on a specific sales channel might discourage us from exploring and adopting new sales strategies or technologies that could potentially enhance our revenue streams and broaden our customer base.

10. *A slowdown or shutdown in operations of our manufacturing partners could have an adverse effect on our business, results of operations, financial condition and cash flows.*

Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including productivity of our workforce, compliance with regulatory requirements and those beyond our control, such as the breakdown and failure of equipment or industrial accidents, severe weather conditions, natural disasters, as well as loss of licenses, certifications and permits, regulatory changes and government imposition of closure or lockdown. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs, difficulties with production costs, product quality issues, disruption in electrical power or water resources and could cause disruptions in our operations or shut down the affected manufacturing facility. Our inability to effectively respond to any shutdown or slowdown and rectify any disruption, in a timely manner and at an acceptable cost, could result in us being unable to satisfy our contractual commitments, which could have an adverse effect on our business, financial condition and results of operations.

Further, although we have not experienced any strikes or labor unrest in the past, we cannot assure you that we will not experience disruptions in work in the future due to disputes or other problems with our work force. Any disagreements with labor unions or labor unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations, which in turn could adversely affect our business, financial condition and results of operations and cash flows.

11. Our reliance for the management of our warehouses and retail stores by third parties, which could have material adverse effect on our goodwill, if not operated accurately.

Our business depends upon our goodwill and brand image. The reputation and integrity of the parties with whom we engage in business activities, which are important to our own reputation and ability to continue to operate in compliance, could be materially affected if the warehouses and retail stores are not operated accurately. Consequently, adverse publicity in relation to our brand image and products may have a material adverse effect on our reputation. While we endeavor, through contractual protections and otherwise, to ensure that such parties comply with high standards of probity and integrity, such as through proper implementation of our compliance and monitoring systems, we cannot assure you that such parties will always maintain these high standards, which could negatively impact our business, prospects, financial condition and results of operations.

12. We are heavily reliant on our relationships with certain online marketplaces and offline distributors. Disruption to such relationships, changes in their business practices, their failure to meet payment schedules and provide timely and accurate information, conflicts among our channels of distribution or our inability to further expand our distribution network could adversely affect our business, cash flows and results of operations.

We have an extensive sales network, which, as of March 31, 2023, comprised 800+ active distributors and 24,000+ active retailers. We are dependent on our distributors for the sale of our products and we enter into exclusive or non-exclusive agreements with our distributors for distribution of our products within specific and territories. While we believe that our relationship with these parties has been satisfactory, we have not entered into long-term agreements with our distributors. Our distributors could change their business practices, such as inventory levels, or seek to modify their contractual terms, such as payment terms. We may face the pressure to modify our trading terms if our distributors are unable or unwilling to continue observing our previously agreed terms. Additionally, unexpected changes in inventory levels or other practices by our distributors or other their retail outlet customers could negatively affect our business, cash flows and results of operations.

In order to expand the sales volume of our products, it is essential that we continue to expand the density as well as the geographic reach of our existing distribution network and ensure that our products reach every market segment and customer base. If we are unable to continue to expand our distribution network, our business may suffer.

13. The success of our business depends substantially on a number of key management personnel, including our Promoters and management team, and on our operational workforce. Our inability to retain them or to recruit highly skilled technical personnel that are necessary for our business could adversely affect our businesses.

Our success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for the management and running of our daily operations

and the planning and execution of our business strategy. Our key management personnel are experienced in managing our businesses and are difficult to replace. They provide expertise which enables us to make well informed decisions in relation to our businesses and our future prospects. We cannot assure you that we will continue to retain any or all of the key members of our management. The loss of one or more members of our senior management team could impact our ability to execute our growth strategy and grow our revenues.

Our ability to implement our business strategy will depend, in large part, on our ability to attract, train, motivate and retain highly skilled personnel. Competition for senior management and other key personnel with technical and industry expertise in our industry is intense, and we may not be able to recruit and retain suitable persons to replace the loss of any of our senior managers in a timely manner. In such a situation, our ability to realize our strategic objectives could be impaired. We believe that our future success depends largely on our continued ability to hire, assimilate, retain and leverage the skills of qualified engineers and other highly-skilled personnel needed to develop successful new products.

As of March 31, 2023, we employed a total of 211 employees, in the Company who are deputed/reporting at the registered office located at New Delhi. Although we have not experienced any strikes or labour unrest in the past, we cannot assure you that our relations with our employees shall remain cordial at all times and that employees will not undertake or participate in strikes, work stoppages or other industrial actions in the future. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations, which in turn could adversely affect our business, results of operations, financial condition and cash flows.

14. Our business is concentrated in the telecommunication equipment category as well as in the wearables category, and variations in consumer demand as well as market sentiment for these product categories could adversely affect our business, results of operations and financial condition.

Our business is concentrated in the telecommunication equipment category as well as in the wearables category. For the financial years ended March 31, 2022 and March 31, 2023, our sales from the Hearable and Wearable category were ₹1,577.92 lakhs and ₹5,929.10 lakhs constituting 13.01% and 22.43% of our revenue from operations, respectively. For the financial years ended March 31, 2022 and March 31, 2023 our sales from the Phones category were ₹8,278.90 lakhs and ₹12,360.88 lakhs constituting 68.26% and 46.76% of our revenue from operations, respectively. We may be susceptible to changes in consumer demand as well as market sentiment for and within the telecommunication equipment category and wearables category in general. Further, the growth of our business is dependent upon the growth in the market for the kind of products we offer. Stagnancy or a decrease in the market for the kind of products we offer could have an adverse effect on our business, results of operations and financial condition. We cannot assure you that demand for our telecommunication equipment category and wearables category will continue at current levels in the future, or that if demand for such product categories decreases, that we would be able to pivot to alternative product categories. Any decline in the sales of our telecommunication equipment category and wearables category may adversely affect our business, results of operation and financial condition.

15. We rely completely on third-party logistics providers for supply and transportation of our products to our distributors.

We do not have an in-house logistics facility and rely completely on third-party logistics providers on provision of logistic services. These third-party logistic providers assist us in supply and transportation of our products to our distributors. The logistic services that our third-party logistic providers provide to us are critical to our supply chain and our ability to manage supply chain risk and distribution costs, as well as maintain control and traceability over our products. However, our third-party logistic providers' ability to provide us with these services effectively depends on a number of factors, some of which are beyond their control. To the extent that our third-party logistic providers experience any disruptions or delays in their operations due to, for example, disruptions in the technology it uses to manage our supply chain, insufficient labour or transportation resources, non-compliance with licensing or permit requirements, breakdowns in machinery or equipment, factors affecting road transportation or its infrastructure, such as political unrest, bad weather conditions and natural disasters, our ability to deliver products to our distributors could be disrupted, which could adversely affect our business, results of operations and financial condition.

We generally believe that a sufficient number of alternative logistic providers are available to deliver our products if our third-party logistic providers are not able to make a delivery. However, such deliveries may be disrupted or delayed or incurred additional cost to us, which could have an adverse effect on our business, results of operations and financial condition.

16. We may face product returns, refunds and recalls as well as product liability and warranty claims and legal proceedings if the quality of our products does not meet our customers' expectations, in which case our business and revenues, and ultimately our reputation, could be negatively affected.

Due to the nature of our business, we face an inherent business risk of exposure to product liability or recall claims in the event that our products fail to perform as expected. Our products may contain quality issues or undetected errors or defects, especially when first introduced or when new models or versions are released, resulting from the design or manufacture of the product, or from the software or other components used in the product. Such quality issues can expose us to product liability or recall claims in the event that our products fail to meet the required quality standards, or are alleged to cause harm to customers. We may face the risk of and experienced legal proceedings and product liability claims being brought against us by various entities including consumers, distributors and government agencies for various reasons including for defective products sold or services rendered. Should any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements, which could increase our expenses and our current liabilities. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims, which could have an adverse effect on our business, financial condition or results of operations. While we follow stringent quality control processes and quality standards and did not experience any product recalls or make any payments for liability claims in the past three financial years, we cannot assure you that we will not experience any product recalls or material product liability losses in the future or that we will not incur significant costs to defend any such claims.

17. We may be required to write down our inventory, which may have an adverse effect on our results of operation.

We perform a detailed review of our inventory based on multiple factors including demand forecasts, product life cycle status, product development plans, current sales levels and component cost trends, in certain circumstances we may be required to record write-downs of our inventory. Some of these circumstances include future demand or market conditions for our products being less favorable than forecasted, unforeseen technological changes or changes to our product development plans that negatively impact the utility of any of our inventories, or significant deterioration in the financial condition of one or more of our suppliers to whom we have made an inventory prepayment. Although we did not record material write-downs of our inventory in the past, such write-downs may adversely affect our financial condition and operating results.

18. Our ability to pay dividends in the future may depend upon our future revenues, profits, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer to the Chapter titled "Dividend Policy" beginning on page 171 of this Prospectus.

19. Our insurance coverage may not adequately protect us, which may adversely affect business operations and financial condition.

We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business. However, there can be no assurance that any claim under the insurance policies maintained

by us will be met fully, in part or on time. In the event, we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

20. We have entered into related party transaction in past and may continue to do so in future and which may involve potential conflict of interest.

As of financial year ended March 31, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled “Restated Standalone Financial Information –Notes to Financial Information- Note 37 - Related Party Transactions” at page 197 of this RHP. While we believe that all such transactions have been conducted on an arm’s length basis and in compliance with the provisions of the Companies Act, 2013, and the applicable accounting standards and other statutory compliances, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties. Further, it is likely that we may enter more/additional related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition.

21. Actual or perceived health risks associated with the use of handsets or other telecommunications equipment could negatively affect our business.

There have been public concerns about health risks arising from electromagnetic fields generated by handsets. Any perceived risk or new findings, regardless of their scientific basis, concerning the adverse health effects of telecommunications equipment could negatively affect our reputation and brand value and result in a reduction in sales. Although we comply with all current electromagnetic field safety standards and recommendations, we cannot assure you that we will not become the subject of product liability claims or be held liable for such claims or be required to comply with future regulatory changes that may have an adverse effect on our business.

22. Our Promoters and Promoter Group will continue to retain control over our Company after completion of the Offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

After the issue our promoters along with the promoter group will continue to hold collectively [•] of the post Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

23. All properties which we use for our business including our Registered Office have been leased. In the event of termination or non-renewal of the leases, our business and revenues may be adversely affected.

All the properties from which we operate our business including our Registered Office and branch office are held on leasehold basis. The lease periods for the properties expire at regular intervals and we initiate the process of renewing such agreements. Our inability to renew or extend the lease of the property may jeopardize our operations. Further, the renewal of the lease may be on substantially higher lease rentals or onerous lease terms. Additionally, if the terms of the leasehold interests expire, we may be unable to extend or renew these interests on economically viable terms

or at all, which could result in our inability to continue to operate on those properties. Further, any adverse impact on the ownership rights of the landlords may impede our effective future operations. Any failure to renew the said agreement could force us to procure new premises, including substantial time and cost of relocation or procure new premises. We cannot assure you that alternative premises will be available at the same or similar costs or locations, in a timely manner. For further details, regarding our registered office and other premises, please refer to the Chapter titled “Business Overview” on page 107 of this Prospectus. This may have an adverse impact on our business, operations and revenues.

24. Our Company, Promoter and Directors are involved in certain litigation which is currently pending at various stages. However, they may face any litigation proceedings in future which may have any adverse decisions in these cases against the Company, Promoter and Director. may impact business and operations of the Company.

Our Company, Promoter and Directors are currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The summary of outstanding litigation in relation to our Company Promoter and Directors as on the date of this Prospectus have been provided below in accordance with the materiality policy adopted by our Board. We cannot assure you that these legal proceedings will be decided in favour of our Company, Promoter, and Directors, as the case may be, or that no further liability will arise out of these proceedings. If any new developments arise, such as change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our Restated Financial Statements that could increase our expenses and current liabilities. Further, such legal proceedings

could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may have an adverse effect on our results of operations and financial condition. Further, there is no assurance that legal proceedings will not be initiated against our Company, its directors, Promoters in future. For details kindly refer the chapter titled “Outstanding Litigation and Material Developments” beginning on page no. 213 of this Prospectus.

25. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. For further details, please refer to Chapters titled “Key Industry Regulations and Policies” and “Government and Other Approvals” beginning on pages 134 and 219 of this Prospectus.

26. We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.

Our Company had negative cash flows from our operating as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

Particulars	(Rs. In Lakhs)		
	As on March 31,		
	2023	2022	2021
Net Cash Flow from / (used in) Operating Activities	(2,036.32)	(49.92)	0.00
Net Cash Flow from / (used in) Investing Activities.	(166.61)	(6.15)	0.00
Net Cash Flow from / (used in) Financing Activities	2,143.65	121.75	10.00

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

27. We do not hold any patents or other form of intellectual property protection in relation to our manufacturing processes, and our inability to maintain the integrity and secrecy of our manufacturing processes may adversely affect our business.

While we possess technical knowledge about our products and design our tools in-house, our know-how may not be adequately protected by intellectual property rights. While we generally take precautions to protect our trade secrets and confidential information against breach of trust by our employees, consultants, job workers, customers and suppliers, it is possible that unauthorized disclosure of our trade secrets or confidential information may occur. We cannot assure you that we will be successful in the protection of our trade secrets and confidential information. Our manufacturing processes may not be eligible for intellectual property protection and others may be able to use the same or similar production processes, thereby undermining any competitive advantage we may have derived from such processes and adversely affecting our financial condition, cash flows and results of operations.

28. Inability to protect our intellectual property or any claim that we infringe on the intellectual property rights of others could erode our competitive advantage and could have a material adverse effect on us.

As on date of this Prospectus, we have four application pending. Our inability to get the trademark registered or renew registration of our trademark and loss of such trademark could have an adverse effect on our business and operation and may harm the ability to brand image and recognition in the industry. For further details, see “Government and Other Approvals” on page no 219. Further, we have taken utmost care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing intellectual property rights. Any claims of intellectual property infringement from third parties could lead us to pay significant costs in responding to, defending and resolving such claims. Further, the risk of being subject to intellectual property infringement claims will increase as we continue to expand our operations.

29. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.

We intend to utilize the Net Proceeds of the Offer as set forth in “Objects of the Issue” beginning on page 70 of this Prospectus. The funding requirements mentioned as a part of the objects of the Offer are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies and since we have not presently entered into any definitive agreements for the use of Net Proceeds. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, we may also use funds for future businesses and products which may have risks significantly different from what we currently face or may expect. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment. For further details, please see “Objects of the Issue” beginning on page 70 of this Prospectus.

30. We have not commissioned an industry report for the disclosures made in the section titled ‘Industry Overview’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.

We have not commissioned an industry report for the disclosures made in the section titled ‘Industry Overview’ beginning of page 88 and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Prospectus. Further, the industry data mentioned in this Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Prospectus in this context.

31. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

32. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into transactions with our certain related parties. While all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and

results of operation. All related party transactions that we may enter into post-listing, will be subject to an approval by our Audit Committee, Board, or Shareholders, as required under the Companies Act and the SEBI Listing Regulations. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects. For details on the transactions entered by us, please refer to Chapter titled “Restated Financial Statement” beginning on page 172 of this Prospectus.

33. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our management and our board of Directors, though it shall be monitored by our Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public. For details, please refer Chapter titled “Objects of the Issue” beginning on page 70 of the Prospectus.

34. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

EXTERNAL RISK FACTORS

35. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in India as well as other countries. Investors’ reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

In addition to the above, our Company is incorporated in India and its assets are located in India. Consequently, our performance and the market price of the Equity Shares may be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;

- epidemic, pandemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID- 19 pandemic;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters (such as typhoons, flooding, earthquakes and fires) which may cause us to suspend our operations;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or
- incurring additional costs to do so.

Any slowdown or perceived slowdown due to these factors could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

36. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled **"Key Industry Regulations and Policies"** beginning on page no. 134 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

37. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations

The Government of India may implement new laws or other regulations that could affect the industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see "Statement of Tax Benefits" on page no. 85 of this Prospectus. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

38. *A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian law.*

Indian law has restrictions that could delay, dissuade, or prevent a future takeover or change of control of our Company. An acquirer is defined under the Takeover Regulations as anyone who, directly or indirectly, acquires or agrees to acquire shares, voting rights, or control over a firm, whether acting alone or in collaboration with others. Although these measures have been drafted to safeguard the interests of investors and shareholders, they may also deter a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

39. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and any other country might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares

40. *Any increase in regional hostilities between India and neighbouring countries, could adversely affect Indian economy and cause our business to suffer.*

India has from time-to-time experienced instances of social and civil unrest and hostilities with neighboring countries. Any escalation in regional tension and conflicts in the future could influence the Indian economy and have an adverse effect on our business, our future financial performance and the market for securities of Indian companies, including our equity shares.

41. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

Furthermore, economic developments globally can have a significant impact on India. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

42. *If inflation rises in India, increased costs may result in a decline in profits.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which

we may not be able to adequately pass on to our consumers, whether entirely or in part, and may adversely affect our business and financial condition. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Furthermore, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

43. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Furthermore, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable law. If a transfer of shares is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Furthermore, this conversion is subject to the shares having been held on a repatriation basis and, either the security having been sold in compliance with the pricing guidelines or, the relevant regulatory approval having been obtained for the sale of shares and corresponding remittance of the sale proceeds. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. We cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

44. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

45. Investors may have difficulty in enforcing foreign judgments against our Company or our management.

Our Company is a limited liability company incorporated under the laws of India. All of our directors and executive officers are residents of India. All of our Company's assets are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to enforce judgments obtained against our Company or such parties outside India.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, which includes, the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended ("Civil Procedure Code"). The United States has not been notified as a reciprocating territory.

In order to be enforceable, a judgment obtained in a jurisdiction which India recognizes as a reciprocating territory must meet certain requirements of the Civil Procedure Code. Section 13 of the Civil Procedure Code provides that foreign judgments shall be conclusive regarding any matter directly adjudicated on except (i) where the judgment has not been pronounced by a court of competent jurisdiction, (ii) where the judgment has not been given on the merits

of the case, (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or refusal to recognize the law of India in cases to which such law is applicable, (iv) where the proceedings in which the judgment was obtained were opposed to natural justice, (v) where the judgment has been obtained by fraud or (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the Civil Procedure Code, a court in India shall, on the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record; such presumption may be displaced by proving want of jurisdiction. The Civil Procedure Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, or other charges of a like nature or in respect of a fine or other penalty and does not provide for the enforcement of arbitration awards even if such awards are enforceable as a decree or judgment. A foreign judgment rendered by a superior court (as defined under the Civil Procedure Code) in any jurisdiction outside India which the Government of India has by notification declared to be a reciprocating territory, may be enforced in India by proceedings in execution as if the judgment had been rendered by a competent court in India. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court.

However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States or other such jurisdiction within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis as a foreign court if an action is brought in India. Moreover, it is unlikely that an Indian court would award damages to the extent awarded in a final judgment rendered outside India if it believes that the amount of damages awarded were excessive or inconsistent with public policy in Indian. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law.

Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

46. Our business is mainly dependent on the stability of policies and economic condition of the countries with which we do business.

The performance and growth of our business is necessarily dependent on the stability of policies and economic conditions of the countries in which we operate, which may be materially and adversely affected by political instability or regional conflicts, a general rise in interest rates, inflation, change in government policies, taxation, and economic slowdown elsewhere in the world or otherwise. Economic growth is affected by various factors including movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the economy of such countries or a further increase in inflation could have a material adverse effect on our services and, as a result, on our business and financial results. Financial turmoil in USA and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability, including the financial crisis and deterioration of credit conditions in these countries, could also have a negative impact on our business.

47. We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could in turn adversely affect our business.

The Competition Act prohibits any anti competition agreement or arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India.

The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the Competition Commission of India, or CCI. Any breach of the provisions of Competition Act, may attract substantial monetary penalties.

The Competition Act aims to, among other things, prohibit all agreements and transactions, which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. We are not currently party to any outstanding proceedings, nor have we ever received any notice in relation to non-compliance with the Competition Act. Any enforcement proceedings initiated by the CCI in future, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI may affect our business, financial condition and results of operations.

48. Increasing employee compensation in India may erode some of our competitive advantage and may reduce our profit margins, which may have a material adverse effect on our business, financial condition, cash flows and results of operations.

Employee compensation in India has historically been significantly lower than employee compensation in the United States and Western Europe for comparably skilled professionals, which has been one of our competitive strengths. However, compensation increases in India may erode some of this competitive advantage and may negatively affect our profit margins. Employee compensation in India is increasing at a faster rate than in the United States and Western Europe, which could result in increased costs relating to scientists and engineers, managers and other mid-level professionals. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Compensation increases may have a material adverse effect on our business, financial condition, cash flows and results of operations.

49. Changes or uncertainty in international trade policies or tariffs could disrupt our export sales outside India or negatively impact our financial results.

Our export sales outside India expose us to number of risks related to trade protection laws, tariffs, excise or other border taxes on products exported to certain countries. Changes or uncertainty in international trade policies or tariffs could impact our global operations, as well as our customers. We may be required to incur additional costs to manufacture and distribute certain of our products. This could adversely impact our business and results of operations.

Risks Relating to the Offer and the Equity Shares

50. An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

51. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares will be determined before filing of Red Herring Prospectus with RoC by our Company in consultation with Lead Manager. The price will be based on numerous factors (For further information, please refer chapter titled — “*Basis for Issue Price*” beginning on page 78 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that

you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

52. *Our Equity Shares have not been publicly traded prior to this Offer. After this Offer, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.*

Prior to this Offer, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Offer.

The trading price of our Equity Shares after this Offer may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India's fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

53. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid, and are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application. Retail Individual Investors can revise their Application during the Offer Period and withdraw their Application until Offer Closing Date.

Therefore, QIBs and Non-Institutional Investors would not be able to withdraw or lower their Application, notwithstanding adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, or otherwise, at any stage after the submission of their Applications.

54. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gain being long term capital gain amounting to upto one lakhs rupees provided Securities Transaction Tax (“STT”) is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares

55. Any future issuance of Equity Shares by us may dilute your shareholding and sales of the equity shares by our Promoter, Promoter Group or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by us may dilute your shareholding in us. In addition, any sales of substantial amounts of the Equity Shares in the public market after the completion of the Issue, including by our Promoter or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could materially impair future ability of us to raise capital through offerings of the Equity Shares. Our Promoter and Promoter Group currently hold an aggregate of 69.95% of the outstanding Equity Shares. After the completion of the Issue, our Promoters will continue to hold 50.07% of the outstanding Equity Shares. We cannot predict the effect, if any, that the sale of the Equity Shares held by our Promoters or other major shareholders or the availability of these Equity Shares for future sale will have on the market price of the Equity Shares.

56. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

A public company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

57. There is no guarantee that our Equity Shares will be listed on the SME platform of NSE Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the stock exchange within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

58. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

59. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

60. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

61. *There may be less information available about the Company in Indian securities markets than in securities markets in other more developed countries.*

There is a difference between the level of regulation, disclosure and monitoring of the Indian securities markets and the activities of investors, brokers and other participants and that of markets in the United States and other more developed economies. SEBI is responsible for ensuring and improving disclosure and other regulatory standards for the Indian securities markets. SEBI has issued regulations on disclosure requirements, insider trading and other matters. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in more developed economies. As a result, shareholders may have access to less information about our business, results of operations and financial condition than those of our competitors that are listed on the Stock Exchanges and other stock exchanges in India on an ongoing basis than shareholders may have in the case of companies subject to the reporting requirements of other more developed countries.

62. Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.

The Equity Shares are quoted in Rupees on the EMERGE Platform of NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders. The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

Debtor Days	0	3	10	30	28
Inventory Days	0	39	86	90	88
Creditor Days	0	49	36	34	31
Working Capital Days	0	(7)	60	86	85

Justification

The company was incorporated in FY 2020-2021, and proprietorship business of promoter was fully taken over in FY 2022-2023. This transition resulted in a substantial rise in the company's working capital requirement between FY 2020-21 and FY 2021-22 compared to FY 2022-23 and beyond. The company follows a business model that demands significant working capital, with a primary focus on inventory and debtors. As of April 25, 2023, the company has successfully raised around 1,863.00 Lakhs through rights issue and is also contemplating additional funds from an IPO to support its growth plans. These funds will enable the company to expand its product reach into untapped areas across the country.

This strategic growth will be achieved through organic means, which is expected to positively impact the company's financials, particularly in terms of increased Revenue & Profit After Tax (PAT). For FY 2023-24, the company aims to fund a major portion of its working capital requirements using Internal Accruals, which include the funds raised through private placement and rights issue, profits from operations, and other internal sources.

During the projected period, there will be a significant increase in debtors primarily due to the company's focus on expanding its presence in new locations. The involvement of new stockists will also contribute to longer debtor days, as each stockist may have different payment agreements. Additionally, the expansion into new areas and meeting increased demand will lead to a rise in inventory storage requirements.

In terms of the pre-defined long-term business growth plans, the Company is expanding its business both in terms of product portfolio and geographies, through online and off-line presence both, and with each new product, category, SKU, warehouse, selling channel launch, the Company need to keep additional inventories, as in our business readily available inventory is the key to drive the growth.

Further, to penetrate new territories, markets, business segments, the Company need to have/ appoint/entertain more distributors, dealers, selling points, and accordingly has to extend little bit more credit/relaxed payment terms, has to fund transit period, all resulting into increase in debtors' days.

Whereas on supply side we have limited supplier who extend credits, but they also have upper cap both in terms of amount and period, so creditors in terms of days does not increase in proportion of the scale.

The business of "Cellecor" was carried out in the name and style M/s Unity Communications, a sole proprietorship of Mr. Ravi Agarwal, who is also a promoter -director of the company. The process to shift the business into a formal company structure was initiated in the later part of financial year 2020-21. The Company got incorporated on December 31, 2020. However, due to technical difficulties, outburst of II wave of COVID-19, and resultant challenging business environment, the transition get delayed, business continued to be carried out in sole proprietorship during the financial year 2020-2021, and only part business was routed through Company during financial year 2021-22, and the entire business get shifted from sole proprietorship to the company at the beginning of financial year 2022-23.

And accordingly, working capital in company's financials for financial year 2020-2021 shows nil, for financial year 2021-2022 at nascent levels, and in financial year 2022-2023 for first full year of operations, and that being so, we estimated our working capital requirements for current and next financial year based on business projections and not on historical basis.

Since transition phase is now over and the company as per its predefined plans for long-term growth, is making all efforts for expanding its business by augmenting the product basket, launching new products and categories, intensifying its existing channels/presence, and expanding its geographical reach in new territories/markets, This expansion encompasses both online and offline channels. Given that available inventory is a key factor in fostering expansion, this strategy is essential, and accordingly the business must retain more inventory on hand to support the introduction of new items, categories, stock keeping units (SKUs), warehouses, and sales channels. Similarly, to penetrate new markets/territories, in initial days we need to offer more credit. All these resulting into increased working capital requirement, as detailed in Exhibit-I & II.

Now after explaining our business plans with detailed timeline, we wish to humbly explain the increase in working capital requirements, item-wise/head-wise as per the following submission:

Debtor days:

In financial year 2022-2023 debtors' days are 10 days, whereas we have estimated 30 days, and 28 days debtors in our projected financials for financial year 2023-2024 and 2024-25 respectively. In absolute term incremental increase in debtors from FY22-23 to FY23-24 is Rs. 30.88 Crores whereas from FY23-24 to FY24-25 it is Rs. 15.21 Crore

In this regard it is humbly submitted that for business growth, the Company is entering into new markets, introducing new products, categories and as such have to extend more credit, as they need more support from company in financials terms, to its selling channels/partners, to register more sale.

Further, as compared to previous years, we are increasing our online sale segment, in financial year 2022-2023 our sales through online channel was only Rs. 8.62 Crores constituting hardly 3% of the total sale, whereas in current fiscal we have already registered sale of Rs. 12.5 Crores till July 2023 through online channels like Amazon, Flipcart etc. and aiming to achieve Rs. 70-90 Crores online sales by year end, constituting approx. 15-20% of this years' targeted sales, please note substantial online sales happens during the festive season, which is to start shortly with Rakshabandan and continues post New Year Celebrations, wherein all big portals announce their BIG Billion Day Sale, Great India Sale Festival etc. It is pertinent to also mention that we have also started online sales on company's own portal also, and expecting a good sales volume going forward therein also. These online channels/portals, though give company's product more reach and visibility, driving sales volumes, but demands longer credit periods, say 45-75 days. These online sales segment alone requires additional debtors of approx. Rs. 15 Crores in FY23-24 whereas debtors for this segment alone would be approx. Rs. 25 Crores in FY24-25

Furthermore, for expanding our sales partners channels across new geographies, for our partners/channels located in tier 3 and tier 4 cities/towns across in distant locations, we need to fund transit days as well, which also inflate the debtors' collection period. This segment shall also require additional working capital of approx. 15 Crore in FY23-24 and Rs. 5 Crores in FY24-25

Considering all these factors/developments, we estimated debtor's days of 30 and 28 days going forward, which are considering the industry trends are reasonable and justified.

Inventory days:

In a similar vein, the company's procurement and production activities are reliant on vendors located in India, thereby minimizing transit times. Consequently, the inventory holding period largely in line with the projected sales growth, has estimated with a marginal increase, from 86 days in the financial year 2022-23 to 90 days in the financial year 2023-24. Though the inventory has been projected at relatively constant holding period, the value of inventory is set to rise with introduction of new products, SKUs, increase in warehouse and sales network from new geographical markets. and accordingly the value of inventory increases from 5,143.86 Lakhs in the fiscal year 2022-23 to 8,983.45 Lakhs in the fiscal year 2023-24.

Presently, Company is having 2 (Two) Mother-Warehouses and 7 (seven) Other Warehouses. In both the Mother Warehouses, considering the present SKUs, we have to keep inventory of approx. Rs. 28-30 Crores whereas other warehouses need inventory of Rs. 3-4 Crore each which comes in totality Inventory of Rs. 51.44 Crores as on March 31, 2023

During the FY2023-24 to expand our business further, we are planning to open 3 more other warehouses (total 10 Other Warehouses), as detailed in Exhibit- IV, and there shall be addition of approx. 250+ more SKUs, as detailed in Exhibit- III, during the year, and this 'll require inventory of approx. Rs. 40-45 Crores at Mother-Warehouses (both taken together), whereas other warehouses need inventory of Rs. 4-6 Crore each and accordingly we estimated Total Inventory of Rs. 89.83 Crores as on March 31, 2024

And similarly during FY24-25 there shall be addition of further more SKUs and 4 more Other Warehouse (totalling to 14 Other Warehouses), and accordingly inventory is estimated to be of Rs. 135.12 Crores (Inventory of 74 approx.. Rs. 55-60 Crores at both Mother-Warehouses situated in Delhi NCR and inventory of Rs. 6-7 Crore each at Other Warehouses spread across India).

Advance to Suppliers:

Since our product offering is moving towards more advanced, critical, and value-added products, to ensure consistent supplies, we need to place certain orders with certain vendors by paying them in advance. These advances serve to facilitate timely procurement, assembly, and delivery of goods, preventing delays due to financial constraints. The surge in advances to creditors from Rs. 869.61 Lakhs to Rs. 2,376.57 Lakhs is mainly because of incremental requirement of paying advances for securing regular supplies of new value-added product's launch, as their suppliers do not supply on credit.

Creditor Days:

The outstanding amount owed to creditors has risen from Rs. 2,483.70 Lakhs in the financial year 2022-23 to 4,000.00 Lakhs in the financial year 2023-24 which is in line with the projected sales growth. Despite this increase, the creditor days remained relatively stable, shifting from 36 days in FY 2022-23 to 34 days in FY 2023-24.

Other Current Liabilities:

Additionally, within the classification denoted as Other current liabilities, which encompasses components including Short Term Borrowings, Advances from customers, provisions for taxes net of advances, and other statutory and current liabilities, there has been a decrease in the time span of holding. This decrease is evident as the period has gone down from 37 days during the fiscal year 2022-23 to 32 days in the fiscal year 2023-24.

Overall Working Capital Need:

We are a growing Company which is expanding both in terms of products and markets and as such various constituents of working capital requirement shall not be liner path. However, taking into account all these factors, the overall working capital requirement has shown a progressive increase, growing from 13 days in the fiscal year 2021-22 to 39 days in the fiscal year 2022-23, and further to 87 days in the fiscal year 2023-24 which is considering the company's business plans, position in industry matrix and prevailing trade practices, should be considered as reasonable and justified.

GLOBAL OUTLOOK

The baseline forecast is for growth to fall from 3.4 percent in 2022 to 2.8 percent in 2023, before settling at 3.0 percent in 2024. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7 percent in 2022 to 1.3 percent in 2023. In a plausible alternative scenario with further financial sector stress, global growth declines to about 2.5 percent in 2023 with advanced economy growth falling below 1 percent. Global headline inflation in the baseline is set to fall from 8.7 percent in 2022 to 7.0 percent in 2023 on the back of lower commodity prices but underlying (core) inflation is likely to decline more slowly. Inflation's return to target is unlikely before 2025 in most cases.

Global Prospects and Policies:

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia's invasion of Ukraine — manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks' generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme

pressure (Figure 1.1). Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist (see also Chapter 1 of the April 2023 Global Financial Stability Report).

Prior to recent financial sector ructions, activity in the world economy had shown nascent signs of stabilizing in early 2023 after the adverse shocks of last year (Figure 1.2, panels 1 and 2). Russia’s invasion of Ukraine and the ongoing war caused severe commodity and energy price shocks and trade disruptions, provoking the beginning of a significant reorientation and adjustment across many economies. More contagious COVID- 19 strains emerged and spread widely. Outbreaks particularly affected activity in economies in which populations had lower levels of immunity and in which strict lockdowns were implemented, such as in China. Although these developments imperiled the recovery, activity in many economies turned out better than expected in the second half of 2022, typically reflecting stronger-than-anticipated domestic conditions. Labor markets in advanced economies—most notably, the United States—have stayed very strong, with unemployment rates historically low. Even so, confidence remains depressed across all regions compared with where it was at the beginning of 2022, before Russia invaded Ukraine and the resurgence of COVID- 19 in the second quarter (Figure 1.2, panel 3).

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks’ tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geoeconomic fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing— particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability.

Inflation Is Declining with Rapid Rate Rises but Remains Elevated amid Financial Sector Stress:

Global headline inflation has been declining since mid-2022 at a three-month seasonally adjusted annualized rate (Figure 1.3). A fall in fuel and energy commodity prices, particularly for the United States, euro area, and Latin America, has contributed to this decline (see Figure 1.SF.1). To dampen demand and reduce underlying (core) inflation, the lion’s share of central banks around the world have been raising interest rates since 2021, both at a faster pace and in a more synchronous manner than in the previous global monetary tightening episode just before the global financial crisis (Figure 1.4). This more restrictive monetary policy has started to show up in a slowdown in new home construction in many countries (see Box 1.1). Inflation excluding volatile food and energy prices has been declining at a three-month rate—although at a slower pace than headline inflation—in most (though not all)

major economies since mid-2022. Even so, both headline and core inflation rates remain at about double their pre-2021 levels on average and far above target among almost all inflation-targeting countries. Moreover, differences across economies reflect their varying exposure to underlying shocks. For example, headline inflation is running at nearly 7 percent (year over year) in the euro area—with some member states seeing rates near 15 percent—and above 10 percent in the United Kingdom, leaving household budgets stretched.

(Percent, three-month moving average; SAAR)

Note: The figure shows the distribution of headline and core CPI inflation developments across 18 advanced economies and 17 emerging market and developing economies. Core inflation is the percent change in the consumer price index for goods and services, but excluding food and energy (or the closest available measure). For the euro area (and other European economies for which data are available), energy, food, alcohol, and tobacco are excluded. The shaded band depicts the 25th to the 75th percentiles of the cross-economy distribution of the indicated inflation measure. The 35 economies in the sample for the figure account for about 81 percent of 2022 world output. CPI = consumer price index; SAAR = seasonally adjusted annualized rate.

(Percentage point change a year by episode, distribution by economy group)

Sources: Haver Analytics; and IMF staff calculations.
Note: The figure shows the distribution (25th to 75th percentiles, median, and weighted average) of the annualized average percentage point change in policy rates by economy group over two episodes: May 2004 to July 2007 (pre-GFC) and Jan. 2022 to Jan. 2023 (post-COVID). AEs = advanced economies; EMDEs = emerging market and developing economies; GFC = global financial crisis; PPPGDP = nominal gross domestic product in purchasing-power-parity international dollars.

The effects of earlier cost shocks and historically tight labor markets are also translating into more persistent underlying price pressures and stickier inflation. The labor market tightness in part reflects a slow post-pandemic recovery in labor supply, with, in particular, fewer older workers participating in the labor force (Duval and others 2022). The ratios of job openings to the number of people unemployed in the United States and the euro area at the end of 2022 were at their highest levels in decades (Figure 1.5). At the same time, the cost pressures from wages have so far remained contained despite the tightness of labor markets, with no signs of a wage-price spiral dynamic—in which both wages and prices accelerate in tandem for a sustained period—taking hold.

In fact, real wage growth in advanced economies has been lower than it was at the end of 2021, unlike what took place in most of the earlier historical episodes with circumstances similar to those prevailing in 2021, when prices were accelerating and real wage growth was declining, on average (Figure 1.6).

Note: The figure shows the evolution of the Beveridge curve in the indicated economy, before and after the start of the COVID-19 pandemic. The relationship describes how the job openings rate (vacancies as a proportion of employment plus vacancies, y-axis) varies with the unemployment rate (number of unemployed as a proportion of the labor force, x-axis). Curves that are farther out from the origin may indicate greater labor market frictions. Labor markets are tight when the unemployment rate is low and the job openings rate is high.

Note: The figure shows the evolution over time of historical episodes similar to 2021 in which three of the preceding four quarters had (1) rising price inflation, (2) falling real wages, and (3) stable or falling unemployment. Twenty-two such episodes are identified for a sample of 30 advanced economies from 1960 to 2021. See Chapter 2 of the October 2022 *World Economic Outlook* for more details. The COVID-19 line shows the average behavior for economies in the sample starting in 2021:Q4.

INDIA ECONOMIC OUTLOOK:

India recently released GDP estimates for the October–December quarter of FY 2022–23 (Q3) along with revisions of the past three years’ data. GDP data suggests that India emerged stronger from the pandemic than initially assumed, with growth gathering steady momentum since FY 2022–23 (figure 1). GDP growth for FY 2020–21 was revised up by 0.77 percentage points, implying the recession was not as deep as previously thought. For FY 2021–22, meanwhile, growth was revised up from 8.7% to 9.1%, suggesting stronger rebound. This upward revision was primarily because of the stronger-than-anticipated growth in manufacturing and construction. Data for the latest quarter (Q3) points to 4.4% year-over-year (YoY) growth in Q3, which is close to what we had estimated (4.5% YoY) in January (figure 2). Although it appears to be the weakest quarter of this fiscal, the significant upward revision of last year’s data increased the base for this year’s growth estimates.

Two observations are worth noting: Despite the global slowdown, exports performed well, probably because of the depreciated currency against the dollar. While goods exports remained modest, India’s services exports skyrocketed by 30% between April and February. A strong digitization drive the world over, cost-cutting measures by businesses to deal with the impending slowdown, and the growing trend of remote working increased demand for exports of services in technology, where India has a comparative advantage. Interestingly, the share of business and professional services in total services exports also increased as companies globally now prefer outsourcing a wide range of professions, such as accounting, audit, R&D, quality assurance, and after-sales service.

Second, the past few quarters’ data point to fiscal prudence and discipline as government spending contracted for the second consecutive quarter. GVA growth in public administration services also fell. In the first 10 months, the fiscal deficit accounted for 67.8% of the target deficit of this fiscal year. The government’s effort to consolidate its expense instils confidence that it may reduce the fiscal deficit to below 4.5% by 2025–26, with a fairly steady decline over the period as charted in the budget this year.

Future growth will be contingent on investment:

Growth in investments will be critical to meet India’s rising demand and ensure noninflationary growth in the long run. The inability to build up capacity would mean that India will have to suppress demand, failing which will result in inflation spiraling up. The challenge is several headwinds have kept investors at bay, and may likely continue doing so, at least in the near term.

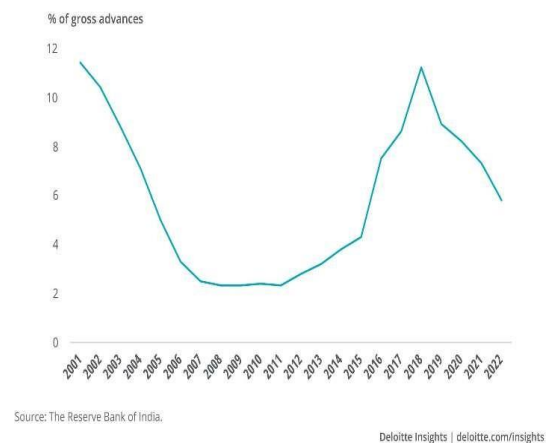

What ails investment?

We consider three downside risks emerging from:

- A slowdown in global economy and trade;
- Rising geopolitical uncertainties; and
- Rapidly shifting energy landscape.

Rapidly tightening monetary policies across industrial economies have led to a global liquidity freeze and tighter credit conditions, making it expensive and difficult for businesses to borrow. Global uncertainties and geopolitical shifts have restructured supply chains and altered trade flows and relationships. All of these have led to lower visibility of future demand for products and services, thereby deterring investors to incur large expenses on futuristic projects. Production costs, meanwhile, have escalated because of supply chain issues and rising energy prices, resulting in bearish investor sentiment. The shift toward sustainability and alternate renewable energy sources, albeit gradual in the initial years, is adding to costs. Several nations have accelerated their efforts toward energy transition to reduce dependence on conflicted geographies for energy requirements and carbon footprint. The nature of such transitions is likely to be expensive in the near term.

FIGURE 3
The amount of nonperforming loans have come down substantially in recent times
Scheduled commercial banks: Nonperforming loans ratio

This is because the world's energy demand will be met with supply constraints as investments in conventional energy sources fall. At the same time, the shift toward renewable sources will be gradual because of the gestation lag of investment and the lack of mass economies. For India, which has been battling higher prices for years now, sustained pressure on global prices may not bode well for the investment outlook. Recent earning and equity price data suggests that inflationary pressures have impacted profitability and margins.

But not all is gloomy. Corporate profits are up because of rising prices. Deleveraged balance sheets have improved businesses' ability to invest. Even banks have healthy balance sheets: With nonperforming assets coming down and margins witnessing an improvement due to rising policy rates, banks' willingness to lend has gone up substantially (Figure 3). In fact, there are cues, such as the widening saving-investment gap and the highest capacity utilization of manufacturing firms since pre-pandemic times, suggesting that India may be at the cusp of private investment revival.

What can the government do?

Undoubtedly, the Reserve Bank of India (RBI) has shouldered a major responsibility of cushioning the economy from rising prices and maintaining liquidity. Yet, navigating inflation and preserving financial stability, while boosting growth drivers, have been a tightrope walk for policymakers.

We expect the government to focus on a three-pronged strategy:

A well-balanced monetary policy: Amidst inflation concerns, the RBI is unlikely to let its guard down and will keep the monetary policy tight. The downside of the move is that higher policy rates will raise borrowing costs, which will in turn moderate credit growth (although it is very strong relative to the past five years).

While prioritizing stability is the need of the hour, the government cannot afford to overlook growth. India needs investments to remove supply bottlenecks and meet the rising demand. Low credit availability will impact capacity-building. In short, too much tightening will result in a vicious circle of low credit availability, investment, and

supply, thereby causing further inflation. The RBI's latest move to halt the rate-hike cycle is an indication that the RBI also wants to keep economic growth into consideration as it aligns inflation with the target.

Amplify efforts in spending on infrastructure while consolidating expenses: Over the last year, investment flows from abroad have remained modest. The drying up of global liquidity due to tighter monetary policies in central banks across industrial countries resulted in low gross inward FDI to US\$61.5 billion during 2022– 23 (April 2022–January 2023) from US\$70.5 billion a year ago (figure 4). The investment gap caused by low private and foreign investment has to be filled by the government through higher spending on infrastructure and improving the logistics ecosystem. Initiatives such as the National Infrastructure Pipeline, PM Gati Shakti, and National Logistics Policy (NLP), among others, are efforts in that direction. These will also improve logistics costs and efficiency and crowd in private investment. Thankfully, a study by the State Bank of India suggests that capital productivity has improved significantly over the last decade, and hence, any incremental investment spending will generate much larger output than it did in the past.

Capitalize on services as manufacturing ramps up: Emphasis on manufacturing and initiatives such as production-linked incentives will attract investment and those efforts must continue. At the same time, the government must take advantage of the rising demand for services worldwide. The services sector has shown promising growth in exports lately, thanks to global digitization efforts and greater acceptance among multinationals (MNCs) to run operations remotely. India must reap benefits where it has a comparative advantage and build a robust and efficient ecosystem to bring more MNCs to its shore. This will have a spillover on investments in the manufacturing space as well.

OVERVIEW OF GLOBAL MOBILE ACCESSORIES MARKET

The global mobile accessories market size was valued at USD 82.88 billion in 2021 and expanding at a compound annual growth rate (CAGR) of 6.8% from 2022 to 2030. The mobile accessories market is expected to expand due to the increasing demand for smartphones as they are an effective means of communication around the globe. This is expected to drive the market in the forecast period. Furthermore, increasing demand for wireless devices, coupled with frequent changes in technologies, is expected to drive the market in the near future. For instance, companies are coming up with the latest technologies such as wireless headsets and speakers. This has boosted the market demand in recent times. The world witnessed severe supply chain disruptions since the COVID-19 outbreak. Disturbances in the overall smartphone market affected the growth of the mobile accessories market as well as fewer shipments of smartphones translated into dwindling demand for mobile phone accessories.

The lockdown resulted in reduced sales growth. However, even though the lockdown heavily affected the supply of these products, the impact was merely temporary as the mobile accessory market started to witness a recovery in sales when the restrictions were lifted.

The fact that the products make the usage of mobile phone simpler and smooth thereby making them popular among consumers. For instance, the introduction of smartwatches has made it simpler to see the notification and calls without taking out the phone from the pocket. The innovation of power banks has made it simpler for consumers who use smartphones extensively and travel frequently.

Increasing quality and features of smartphones with decreasing prices have led to an increase in the number of consumers for the product, which eventually increases the demand for safety and security of the phones as the consumer in modern times is less bothered to go the extra mile to keep their phone safe, trendy, and vogue. An increase in internet penetration, coupled with artificial intelligence incorporated by online retailers that give pop-up notifications to the users about the product is also a prominent factor for the market growth.

Distribution Channel Insights

The offline segment dominated the mobile accessories market and accounted for a 69.2% share of the overall revenue. Increasing demand for costly devices such as smartwatches and mobile camera lenses and perception of issues with the delivery of fragile items are propelling the segment's growth. The traditional method of shopping and the difference in price in local retail outlets and other wholesale markets are the reasons for the segment growth.

The online segment is anticipated to expand at a CAGR of 7.6% during the forecast period. Increasing internet penetration in rural areas, faster and trusted delivery by various online portals, and replacement options are the factors driving the segment.

Moreover, the young working consumer groups with hectic schedules prefer to buy online rather than offline due to easy access and doorstep service. These are the prominent factors boosting the market growth in the stipulated time frame.

Product Type Insights

The protective cases segment accounted for a leading share of 31.6% in 2021 and is expected to witness significant growth in the near future. Increasing demand for the cases due to frequent changes in the product in the female consumer group is anticipated to drive the market. Furthermore, innovation in the material type compatibility of the cases with certain smartphones, such as apple, prefers special kinds of cases to highlight the logo on its back. This is propelling the market growth in the forecast period.

The headphone segment is expected to register a CAGR of 7.3% during the forecast period. One of the most developing trends in the mobile industry at present is the growing sophistication of headphones, which is also fueling the market growth for unconditional connectors such as type-c USB Ports cables. Growing fitness consciousness among the young population has driven demand for sports and fitness headphones in recent times.

The popularity of cheap headphones has increased among the economical consumer group due to the rise in traveling trends standalone.

Regional Insights

In 2021, Asia Pacific led the market with a share of 46.2% and is anticipated to witness significant growth in the near future. In Asia Pacific, China contributed to the majority of the share and accounted for 55.2% share of the overall revenue in 2021. High usage of different types of mobile accessories, innovation of different products at lower rates, and China is the leader of the mobile phone industry are the prominent factors for market growth in the region.

Middle East and Africa is the fastest growing region due to the high demand from developing countries such as UAE and Saudi Arabia. Changing lifestyles and increasing disposable income are the factors expected to drive the market in the forecast period. Moreover, increasing demand for smartphones in the region is driving the market for accessories. For instance, one of the surveys has shown that the market for smartphones in MEA has increased by 300.0 million in a number of units in 2021.

Key Companies & Market Share Insights

The market presents moderate to low entry barriers due to the presence of a large number of unstructured dealers in the market. The market is further driven by innovation in technology, mergers & acquisitions, and joint ventures. For instance, the one plus brand comes with fast chargers compatible with their phones. Afterward, the manufacturer of such devices has come up with chargers that are compatible with all the devices and charge the device fast. The companies also spend a huge chunk of their revenue on research and development as the industry witnessed frequent changes in technologies. In order to gain a competitive edge, the market players require an understanding of the need for the product among the consumers.

(Source: <https://www.grandviewresearch.com>)

INDIA MOBILE ACCESSORIES MARKET

The India Mobile Accessories market is anticipated to register an impressive CAGR during the forecast period. The market is driven by the increasing number of smartphone users, rising internet penetration, and product innovation.

Any type of hardware that is not already included in a mobile phone's body is referred to as a mobile accessory. Majority of the time, these accessories are bought for mobile phone safety and to fully utilize their benefits. Accessories for mobile phones can improve their usability, efficiency, and aesthetic appeal. The market for mobile phone accessories in India is expected to increase favorably over the projected period as a result of trends such as the rising urban population and higher usage of e-commerce. For instance, the predicted urban population of India was close to 400 million in 2021. Owing to their accessibility, consumers are more likely to purchase such accessories in metropolitan regions.

The market is also driven by the increasing number of social network users. For instance, the estimated number of social network users in India as of 2020 was 500 million, and by the year 2040, it is expected to exceed 1 billion. Owing to consumers being more active in posting advertisements for products, the industry is growing rapidly as the number of social network members increases. The market is also expanding as a result of the acceptance of online shopping.

Availability of Unique and Stylish Protective Cases are Fueling the Market Growth

Indian consumers, particularly those who live in metropolitan areas, are shifting towards fashionable protective cases. Protective cases are the focus of many businesses to meet the need of Indian consumers who are becoming more fashion aware. This has led to an upsurge in the demand for fashionable protective cases among Indian fashion brands. For example, Samsung Electronics Co. Ltd. unveiled a brand-new and inventive protective cover with LED displays and slots for storing cards or cash. Along with other things, the LED display serves to alert users when they get messages, calls, and the time.

Growing Smartphone Penetration Drives the Market Growth

India has more than 1.2 billion mobile phone users and 600 million smartphone users as of 2022, according to the Ministry of Information and Broadcasting. Smartphones' rapid technical advancement in the twenty-first century has led to their widespread use as a utility for routine chores such as alarms, task reminders, remote appliance control, and others. Additionally, applications that explore entertainment and media functionalities such as big touch displays, speakers, simple volume controls, voice control, and other features offer value to the market. As a result, to a significant extent, smartphones have replaced laptops, cameras, wristwatches, and other equipment.

Additionally, features such as handsfree and others create a demand for headsets and headphones, pushing the user to purchase these mobile accessories. The brittle design and screen of mobile phones also encourage customers to buy screen protectors and protective cases. To attract customers, these protective items are produced with attention to both design and quality. As a result, the market for mobile phone accessories is also growing as smartphone adoption rises.

Lack of Standardization to Hinder Market Growth

The lack of standards is expected to hinder the expansion of the global market for mobile phone accessories. Regarding the technologies and components used to make mobile accessories, there is a lack of sufficient standards. Market standards that are not clear cause significant pricing and product differentiation.

Strong Distribution Channel to Boost the Market Growth

It is projected that factors such as the existence of a strong distribution network, such as multi-brand stores and online retailers of mobile phones and accessories, will accelerate the expansion of the India mobile accessories market. A significant number of consumers from the middle-class and lower-income groups are also being drawn to buy mobile phone accessories due to the decline in the average selling price.

Market Segmentation

India's Mobile Accessories market is segmented on the basis of product type, price range, distribution channels, and regions. In terms of product type, the market is further segmented into headphones & earphones, TWS (True Wireless Stereo), smart wearables, protective cases, power banks, chargers, and others. In terms of price range, the market is divided into low, medium, and high. In terms of distribution channels, the market is further segmented into local shops, multi branded stores, exclusive stores, supermarkets/hypermarkets, online, and others.

GLOBAL SMART WATCH MARKET

The global smartwatch market size was USD 30,434.1 million in 2021 and is expected to expand at a compound annual growth rate (CAGR) of 8.2 % from 2022 to 2030. The market is anticipated to witness a surge in adoption owing to the growing inclination for fitness tracking and health monitoring features. Manufacturers have introduced smartwatches with advanced health monitoring features such as blood oxygen and SpO2 sensors, a stress monitor, electrocardiograms, a calorie counter, and more. Several companies such as SAMSUNG-, Noise, Fitbit, FOSSIL GROUP, INC., and more are introducing smartwatches with health monitoring devices. For example, in September 2021, Apple, Inc. launched the new Apple Series 7 smartwatch model that features multiple health monitoring functions, such as native sleep tracking, blood oxygen saturation, electrocardiogram (ECG) sensor, improved fall detection, and heart health monitoring.

Smartwatches, like other wearable devices, come packed with features such as calling/messaging, navigation, voice assistance, pairing with other connected devices, and more, enabling users to automate their daily activities. The smartwatch market has experienced fundamental technological developments related to operating systems and interfaces (UI). This has enabled companies to provide smart watches with lag-free UI and advanced features in a short span of 3-4. For instance, in June 2021, Garmin International Inc. launched the Forerunner 945 LTE, a triathlon smartwatch that has features of LTE connectivity, GPS, and more.

The Internet of Things (IoT) wearable helps make data-driven decisions and enables users to connect with colleagues remotely for video conferencing. Smartwatches include IoT-related features that allow the received information to be transmitted to a remote server, enabling real-time monitoring of individual behavior. Furthermore, IoT-based smartwatches can be connected with IoT devices to monitor users' physical activity. IoT-enabled smartwatches are used across various applications, including edge analytics, computational offloading, sports sector, biometric readings, automatic device connection, and more. Smartwatches have finally created IoT applications with human components; hence, the growing applications of smartwatches are expected to drive the market.

The COVID-19 outbreak led to manufacturing delays and supply chain disruptions resulting in a minor setback for the consumer electronics industry. The manufacturing and supply of the smartwatches were impacted during the first two quarters of 2020. However, as manufacturing returned to operational levels by the beginning of the third quarter and high consumer demand was generated due to the work-from-home and fitness activities, the smartwatch market experienced steady growth during the pandemic.

The lack of control over the data, collected by the owners via their various smart wearable devices, limits the growth of the market. Most wearable device privacy policies indicate that data obtained would be exchanged with a third-party vendor, paving the way for a data breach. For instance, Fitbit and Apple users' data was leaked online in the year 2021 because of an insecure database comprising more than 61 million records related to wearable and fitness trackers.

Price Band Insights

The USD 200-299 segment dominated the market and accounted for more than 22.6% of the market share in 2021. Vendors such as Huawei Technologies Co., Ltd., Samsung Electronics Co., Ltd., Apple Inc., and Fitbit, Inc. have contributed mainly to the market share. Apple Inc. possesses the highest market share of more than 30.0% and is anticipated to retain its dominance in the future.

Display Technology Insights

The OLED-based smart watches held a high market share of more than 91.5% in 2021 and are expected to retain their dominance during the forecast period. Almost all smartwatches nowadays are equipped with OLED and LCDs and variants. Although OLED technology has a high manufacturing cost, the demand for clear and dynamic displays has propelled manufacturers to incorporate them due to their advantages over LCDs. Furthermore, OLED displays were already in use in televisions and smartphones, which helped the manufacturers, measure the demand for each technology and implement them in smartwatches on a larger scale, thereby bringing down the overall cost under mass production.

OLED displays provide an enhanced experience to the user due to their high image quality and low power consumption. It also offers more room for innovation to the manufacturers, with design possibilities extending to flexible OLED displays. This helps the manufacturers to produce displays in various sizes and shapes without compromising their resolution and quality. Despite the advantages of OLED displays, the LCDs are expected to stay in the market due to their low cost and readability under various conditions.

Regional Insights

North America held the highest market share of more than 44.0% of the overall smartwatch market, followed by Europe and the Asia Pacific. The popularity of Apple, Inc.'s smartwatch series has been a significant factor in driving demand for smartwatches in North America. The early availability of newly launched products and high technology adoption has been critical driving factors to the market growth. Additionally, the proliferation of connected devices and the integration of IoT in smartwatches, adding to the user's convenience, have contributed to higher sales in North America.

Europe emerged as one of the largest regional markets in 2021 and is likely to expand further at a steady growth rate of 8.9% during the forecast period. The increasing disposable income of the various people in European countries and the rising number of connected cars in the region is expected to drive market growth. Furthermore, the increasing inclination of the youth customers toward smart wearables is expected to drive the market growth.

Key Companies & Market Share Insights

The market is competitive with vendors such as Apple Inc., Samsung Electronics Co., Ltd., Huawei Technologies Co., Ltd., Fitbit, Inc., and Garmin Ltd. holding a significant portion of the overall market. Companies are primarily focused on enhancing the connected experiences between connected devices and smartphones with smartwatches by offering software support through upgrades.

INDIAN SMART WATCH MARKET

Global smartwatch shipments contracted 1.5% YoY in Q1 2023, according to Counterpoint Research's latest Global Smartwatch Model Tracker. The 121% growth in India's shipments managed to restrict the decline. This was the second consecutive quarter of a YoY decrease in global shipments, which were hit by the seasonal decline in demand for products from major players like Apple and Samsung, along with consumer sentiment dampened by global financial pressures.

Research Analyst Woojin Son said, "The global smartwatch market, which had been experiencing steep growth for several years, has entered a period of stagnation since the end of last year when it declined 8% YoY in Q4 2022. Amid a global slowdown in demand for tech devices, the smartwatch consumption trend has also undergone a transformation. The market share of high-price and high-performance HLOS smartwatches*, primarily released by Apple and Samsung, decreased from 60% in Q1 2022 to 53%

in Q1 2023. On the other hand, the market share of Basic smartwatches* significantly increased from 23% to 34% driven by rapid growth in the Indian market.

Market summary

- Apple’s shipment volume fell 20% YoY in Q1 2023. This was the first time in three years that its Q1 shipments fell below 10 million units. As a result, Apple’s market share, which was 32% in Q1 2022, dropped to 26%. This can be attributed to the ongoing macroeconomic crisis, which has led to decreased accessibility to relatively higher-priced Apple Watches. Despite the Apple Watch Series 8’s release about a month ahead of its predecessor, it did not achieve the same level of success as the previous model.
- Indian brand Fire-Boltt surpassed Samsung for the first time and reached the second position in the global market. Its shipments increased by approximately three times compared to the previous year and saw a 57% growth compared to the previous quarter. This reflects the rapid growth of the Indian market, just like other local brands such as Noise and boAt.
- While Samsung experienced a 15% increase in shipments in its key market North America, it witnessed a decline in shipments in other major markets. As a result, its overall global shipments declined by 15% compared to the previous year and 21% compared to the previous quarter.
- Huawei, the most influential Chinese OEM, saw a 14% YoY decline in its shipments in the Chinese market, which is a key market for the company. However, Huawei saw increased shipments in India, LATAM and MEA, limiting its overall decline in global shipments to 9%. Huawei has been employing a strategy of relaunching models previously released for the Chinese market in the international market.

In terms of the regional markets, India surpassed North America, reclaiming its position as the top region with a 27% share of global smartwatch shipments. Senior Analyst Anshika Jain said, “India’s smartwatch market grew 121% YoY in Q1 2023 driven by affordability, rising customer demand and availability of a wide variety of options in the budget segment. Around 40% of the total shipments were driven by the <INR 2,000 (<\$25) price band, its highest proportion ever. The share of India-based players crossed 90% for the first time as they were quick in terms of upgrading their portfolios and adapting their products to customer needs at a reasonable price point.”

China’s smartwatch market experienced a significant contraction of 28% compared to the previous year, as the country’s economy showed a slower recovery than expected. This decline represents the sharpest contraction among the major regional markets and the lowest quarterly shipments since the outbreak of COVID-19 in Q1 2020.

Types of smartwatches:

HLOS smartwatch: Electronic watch running a high-level OS, such as Watch OS (Apple) or Wear OS (Samsung), with the ability to install third-party apps.

Basic smartwatch: Electronic watch running a lighter version of an OS, with no ability to install third-party apps.

GLOBAL SMART TV MARKET:

The global smart TV market size was valued at USD 197.82 billion in 2022 and is expected to expand at a compound annual growth rate (CAGR) of 11.4% from 2023 to 2030. The increased popularity of content on over-the-top (OTT) services has provided a boost to the smart TV market. Several TV content creators are introducing new content with varied genres to cater to every type of viewer's demands. These content creators are collaborating with different OTT platforms to form exclusive partnerships. Following this trend, leading streaming platforms such as Amazon Prime, Netflix, Disney Plus, and others have developed custom applications for smart TVs to offer their streaming services. Furthermore, the high demand for smart TVs is attributed to their advanced features such as voice command, screen mirroring/sharing, and video calling, among others, which creates a more appealing environment for the users.

During the COVID-19 pandemic, governments around the world imposed stringent lockdown restrictions, forcing people to stay indoors. The lockdowns have pushed people to turn towards indoor forms of entertainment. Movie producers also followed the trend by releasing movies on over-the-top platforms as movie theaters were closed. Viewers could purchase or rent new movies on streaming platforms and watch them on their smart TVs in the comfort and safety of their homes. This caused a notable rise in internet video streaming and, as a result, the demand for smart TVs.

Moreover, a smart TV includes an operating system, which enables viewers to interact with features such as downloading applications, streaming video, and purchasing content, among others, on the TV. Manufacturers are introducing their own operating systems for the smart TVs that they produce to counter the popular operating

systems. For instance, the Tizen operating system is developed by Samsung Electronics Co. Ltd for their smart TV range, helping viewers access streaming applications to enjoy TV content. Additionally, LG offers its own operating systems, which support exclusive features such as magic remote, voice command, and more.

The trend of video-on-demand (VoD) is likely to drive market growth, as smart TVs support various popular video platforms that offer on-demand content. For instance, ESPN+ smart TV application offers on-demand sports streaming and content. Moreover, customers can browse the internet and run supported applications including educational applications for children on smart TVs. Smart TVs also support the interactive features of educational applications such as voice input, remote cursor, and more.

Moreover, manufacturers are attracting clients by developing affordable products and setting competitive prices for customers. Leading manufacturers produce entry-level to high-end smart TVs, based on features and quality. The high-end smart TVs are produced with high-quality display panels and parts, which significantly increase the product price. On the other hand, affordable smart TVs drive the market's growth by making the product accessible to a wider market and reducing the entry barrier for new customers.

Resolution Insights

The full HD TV segment accounted for the largest market share in 2022, owing to the high-definition picture quality and a wide variety of content supporting it. Full HD TVs provide a resolution of 1920 x 1080 pixels, which has been the industry baseline for many years. This resolution is prevalent as large amounts of existing content support the resolution. Streaming of content and live sports on this resolution does not consume high internet bandwidth while still offering an immersive and good-quality viewing experience.

The 8K TV segment is predicted to expand at the highest CAGR of around 17% during the forecast period of 2023 to 2030, owing to the demand for super high-resolution picture quality. 8K TVs provide detailed image resolution and support over 33 million pixels. The resolution has an ever-growing content library as it becomes more regular in the market. The segment is expected to grow strongly as manufacturers offer added features, such as Dolby Atmos sound, high-dynamic range (HDR), and more.

Screen Size Insights

The 46 to 55 inches segment dominated the market and accounted for the highest revenue share in 2022, owing to the rising trend of purchasing bigger TVs for a theater-like viewing experience. The segment demand is attributed to the screen size-to-price value for consumers. The 46 to 55 inches segment is attractive to viewers as full HD and 4K smart TV prices are reducing, which in turn is increasing demand. Customers are able to purchase bigger TVs as a result of favorable financial payment methods such as EMIs.

The above 65 inches segment is predicted to expand at the highest CAGR of around 16% during the forecast period, owing to the trend of home theaters along with the reduction of smart TV prices. Furthermore, due to the small price difference between over 65-inch smart TVs and regular-sized TVs, zero-cost payback possibilities, discount offers, and other factors, a significant number of buyers looking to buy 55-inch smart TVs do not hesitate to spend a little extra and choose TVs with over 65-inch displays. The number of customers purchasing large-screen television sets is predicted to grow across the globe in the upcoming years, primarily owing to the rising spending capacity. New market entrants also aim to offer products in this segment with competitive pricing.

Operating System Insights

The Android TV segment dominated the market with the largest revenue share in 2022, as a result of the already popular Google Android ecosystem. The segment's stronghold is attributed to the extensive Play Store access for application downloads. It also adds voice search and content aggregation from multiple media applications and services. The Android TV operating system also facilitates integration with recent Google technologies like Knowledge Graph, Cast, and Assistant.

The Roku segment is anticipated to expand at a CAGR of over 16% during the forecast period from 2023 to 2030 due to its Apple AirPlay compatibility, making it simple to stream movies, photographs, music, and other content from an Apple device to a smart TV. Many smart TV manufacturers are teaming up with Roku to provide the in-built feature of Roku software with no requirement of a set-top box. For instance, in 2021, TCL collaborated with Roku and launched a 4K HDR Roku TV. Such developments are driving the operating system segment growth.

Distribution Channel Insights

The offline segment dominated the market and accounted for the largest revenue share in 2022, owing to increasing sales through electronics retailers, independent TV dealers, stores, and distributors. Several consumers prefer to buy electronic products from brick-and-mortar stores as they can immediately check the product quality and compare it with other similar offerings, which leads to faster purchase decisions.

The online segment is estimated to record the highest growth rate from 2023 to 2030, aided by the increasing consumer preference for e-commerce platforms to buy electronic products. These platforms offer greater convenience, offers, discounts, and coupons, attracting a larger customer base. As a result, several companies are aggressively promoting and distributing smart TVs and related accessories through other e-commerce platforms or their independent online sales channels.

Technology Insights

The QLED segment dominated the market and accounted for the largest revenue share in 2022 and is estimated to record a notable CAGR between 2023 and 2030. The technology involves Quantum dots that are durable, stable, inorganic, and provide enhanced color and brightness. The increasing popularity of the product has urged market players to launch new offerings using the QLED technology. In October 2022, Samsung Electronics Co. Ltd introduced updated models of The Frame TV in India. The QLED TV range is equipped with the company's Quantum Processor 4K, providing 4K AI upscaling capability.

The OLED segment is expected to capture a significant revenue share by 2030, owing to high consumer demand driven by their high-end picture quality. OLED TVs come with the ability to produce inky black levels, smooth motion, highly saturated colors, and excellent viewing angles. The launch of new offerings in this segment is expected to enhance the market outlook in the coming years. For instance, in September 2022, Sony Corporation launched Bravia XR Master Series A95K OLED TV in India. The new product is powered by the cognitive XR processor, providing an immersive viewing experience.

Regional Insights

The Asia Pacific region dominated the smart TV market and accounted for the largest revenue share of over 40.0% in 2022. The growing popularity of smart TV in rapidly developing countries like India is significantly driving

regional market expansion. China holds a significant share in the Asia Pacific smart TV market, aided by the emergence of new players such as Hisense Co., Ltd., and TCL Corporation, expanding their footprint and increasing rivalry among major players.

The Europe region is expected to record a CAGR of over 10.1% over the forecast period from 2023 to 2030. Modern developments in content production have added to the demand for smart TVs. For instance, the show *You versus Wild* on Netflix allows users to choose the protagonist's next actions. Moreover, the ever-changing consumer focus on streaming online content, owing to the increasing availability of high-speed internet broadband connections, is further favoring product demand in the region.

Key Companies & Market Share Insights

Key players use strategies such as partnerships, ventures, innovations, research and development, and geographical expansion to solidify their market position. They are focusing on improving their product offerings to better suit the changing needs of users and stay competitive. Streaming platforms are collaborating with manufacturers to preinstall their applications in smart TVs so customers have quick access. Netflix and Amazon Prime, two leading streaming platforms, come preinstalled on Samsung and LG smart TVs.

Leading market players are introducing new products with competitive pricing and different features to cater to a range of customers. For instance, in April 2022, Samsung Electronics Co. Ltd launched its Neo QLED 8K smart TV range. This launch included 65-inch and 85-inch screen-sized televisions. Samsung Electronics Co. Ltd also runs promotional offers, enabling consumers to purchase TVs at lower costs, thus increasing the demand for its products.

INDIAN SMART TV MARKET

India's smart TV shipments grew 28% YoY in 2022, according to the latest research from Counterpoint's IoT Service. The growth for the year was primarily driven by strong shipments during the festive season in the third quarter, multiple new launches, discounts and promotions, and the demand for bigger screen-size TVs in the lower price tier. For Q4 2022, the growth was almost flat at 2% YoY due to a slowdown in demand after the festive season.

Commenting on the market trends, Research Analyst Akash Jatwala said, "Consumers are preferring bigger screen sizes, especially 43", due to which the smart TV shipments in this display size grew 29% YoY in 2022. This size has also started trickling down to the budget price range (INR 20,000-INR 30,000 or ~\$243-\$364). Key Acts, Regulations and Policies governing our Company

Information Technology Act, 2000 ("IT Act")

The IT Act has been enacted with the intention of providing legal recognition to transactions that are undertaken electronically. The IT Act has created a mechanism for authenticating electronic documentation by means of digital signatures, and also provides for civil and criminal liability including fines and imprisonment for various offences. The IT Act prescribes various offences, including those offences relating to unauthorized access of computer systems, unauthorized disclosure of confidential information and frauds emanating from computer applications. By means of an amendment in 2008, the IT Act legalized the validity of contracts formed through electronic means. Additionally, the IT Act creates liability for negligence in dealing with or failure to protect sensitive personal data, and gives protection to intermediaries in respect of liabilities for third party information made available to or hosted by them.

The Digital Personal Data Protection Bill, 2022 (the "DPDP Bill" or the "Bill")

The Ministry of Electronics and Information Technology released the new DPDP Bill on November 18, 2022. Once passed and codified, the DPDP Bill will replace the existing data protection provision (Section 43A) of the IT Act. The Bill seeks to balance the rights of individuals to protect their personal data with the need to process personal data for lawful and other incidental purposes. All data fiduciaries, determining the purpose and means of processing personal data, are mandated to provide an itemised notice in plain and clear language containing a description of the personal data sought to be collected along with the purpose of processing such data. The DPDP Bill further provides that where consent is the basis of processing personal data, the data principal providing the consent, may withdraw such consent at any time. Data principals will have the right to demand the erasure and correction of data collected by the data fiduciary. Any data processed prior to such withdrawal shall be considered lawful. The Bill introduces the concept of 'deemed consent' in instances where the data principal provides personal data (i) to the data fiduciary voluntarily, (ii) for performance of function under any law, or service or benefit to the data principal, (iii) in compliance with a judgment or order, (iv) responding to medical emergency involving threat to life or immediate threat to health of the data principal, (v) for provision of medical treatment or health services during an epidemic, outbreak of diseases or any other public threat to public health, (vi) for taking measures to ensure safety during any disaster or any breakdown

of public order, (vii) for purposes related to employment including prevention of corporate espionage, maintenance of confidentiality of trade secrets, intellectual property, classified information, recruitment, termination of employee, or (viii) in public interest as defined in the Bill.

It further imposes certain obligations on data fiduciaries including (i) implementation of technical and organisational measures to ensure compliance, (ii) adopting reasonable security safeguards to prevent personal data breach, (iii) ensuring that personal data processed is accurate and complete, (iv) informing the Data Protection Board of India (the "Data Protection Board") regarding any personal data breach, (v) deleting or removing personal data no longer in use or necessary for legal or business purposes, (vi) publishing the business contact information of the data protection officer, (vii) implementing a grievance redressal mechanism to redress grievances of data principals, and (viii) processing of data under a valid contract. The Bill provides for the rights and duties to be complied with the data principals. The Bill provides for exclusive jurisdiction of grievances to the Data Protection Board, with a recourse to alternative dispute resolution mechanisms. Any form of non-compliance shall attract financial penalty as prescribed in Schedule I of the Bill.

Consumer Protection Act, 2019 (the "Consumer Protection Act") and rules made thereunder

The Consumer Protection Act was designed and enacted to provide simpler and quicker access to redress consumer grievances. It seeks, amongst other things, to promote and protect the interests of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. The definition of "consumer" under the Consumer Protection Act includes persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. It provides for the establishment of consumer disputes redressal forums and commissions for the purposes of redressal of consumer grievances. In addition to awarding compensation and/or passing corrective orders, the forums and commissions under the Consumer Protection Act, in cases of misleading and false advertisements, are empowered to impose imprisonment for a term which may extend to two years and fine which may extend to ten lakhs.

In line with the Consumer Protection Act, the Ministry of Consumer Affairs, Food and Public Distribution, Government of India ("Ministry of Consumer Affairs") has also notified the Consumer Protection (E-Commerce) Rules, 2020 ("E-Commerce Rules") on July 23, 2020, which provide a framework to regulate the marketing, sale and purchase of goods and services online. The E-Commerce Rules govern e-commerce entities which own, operate, or manage, a digital or electronic facility or platform for electronic commerce, but does not include a seller offering his goods or services for sale on a marketplace e-commerce entity. The Ministry of Consumer Affairs has also released draft amendments to the E-Commerce Rules for public comments. The aforesaid draft amendments require e-commerce entities to, amongst other things, register themselves with the Department for Promotion of Industry and Internal Trade, appoint a chief compliance officer, a nodal contact person and a resident grievance officer. Additionally, the draft amendments prohibit e-commerce entities from misleading users by manipulating search results, prohibit flash sales and abuse of dominant position, and mandate commerce entities to identify sponsored listings of products and services with clear and prominent disclosures

Electronics and Information Technology Goods (Requirement for Compulsory Registration) Order, 2021 (the "EITG Order")

The EITG Order provides for the registration of certain scheduled electronic goods under relevant Indian Standards ("IS") as prescribed by the BIS. As per the EITG Order, no person shall manufacture or store for sale, import, sell or distribute goods which do not conform to the IS specified in the EITG Order. Further, manufacturers of these products are required to apply for registration from the BIS after getting their product tested from BIS recognized labs and requires manufacturers to mandatorily display the relevant IS mark as notified by the BIS on their products. Further, the BIS may notify additional categories of electronic goods requiring registration from time to time. The EITG Order also provides the BIS powers to inspect the premises of the manufacturer to ensure conformity of the products and issue directions in this regard.

Bureau of Indian Standards Act, 2016 ("BIS Act 2016")

BIS Act, 2016 provides for the establishment of the Bureau of Indian Standards ("BIS") for the development of the activities, inter alia, standardization, conformity assessment and quality assurance of goods, articles, processes, systems and services, and formatters connected therewith and incidental thereto. Functions of the BIS include, inter alia, (a) recognizing as an Indian standard, with the prior approval of the Central Government, the mark of any international body or institution at par with the standard mark, for such goods, articles, process, system or service in India or elsewhere; (b) specifying a standard mark to be called the Bureau of Indian Standards Certification Mark which shall be of such design and contain such particulars as maybe prescribed to represent a particular Indian standard; (c) providing training services in relation to inter alia, quality management, standards, conformity assessment; (d) publishing Indian standards; promotion of safety in connection with any goods, article, process, system or service; and (e) any such other functions as may be necessary for promotion, monitoring and management of the quality of goods, articles, processes, systems and services and to protect the interests of consumers and other stakeholders.

Legal Metrology Act, 2009 ("LM Act") and the Legal Metrology (Packaged Commodities) Rules, 2011 ("Packaged Commodity Rules")

The LM Act seeks to establish and enforce standards of weights and measures, regulate trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure or number. The LM Act and rules framed thereunder regulate, inter alia, the labelling and packaging of commodities, appointment of government-approved test centres for verification of weights and measures used, and lists penalties for offences and compounding of offences under it. Any non-compliance or violation under the LM Act may result in, inter alia, a monetary penalty on the manufacturer or seizure of goods or imprisonment in certain cases. The Packaged Commodity Rules define "pre-packaged commodity" as a commodity which without the purchaser being present is placed in a package of a pre-determined quantity. The Packaged Commodity Rules prescribes the regulations for imports, pre-packing and the sale of commodities in a packaged form intended for retail sale, wholesale and for export and import, certain rules to be adhered to by importers, wholesale and retail dealers, the declarations to be made on every package, the size of label and/or importers and the manner in which the declarations shall be made, etc. These declarations that are required to be made include, inter alia, the name and address of the manufacturer, the dimensions of the commodity, the maximum retail price, generic name of the product, the country of origin and the weight and measure of the commodity in the manner as set forth in the Packaged Commodity Rules. The Packaged Commodity Rules were amended in the year 2017 to increase protection granted to consumers especially relating to e-commerce entities. Pursuant to the amendments, the inventory e-commerce entity itself will be made liable and punishable for failure to make relevant declarations on its platform as required under the Act and the Rules.

Laws relating to Country of Origin

Currently, Legal Metrology (Packaged Commodities) Rules, 2011 ("Packaged Commodity Rules") require a declaration of 'country of origin' or 'country of manufacture' or 'country of assembly' on the imported products. This is aimed at curbing false and misleading claims by the brands to deceive the customers, as also to give complete information of the product to a potential buyer. Demands for specifying the Country of Origin ("COO") of products sold online has gained ground in view of Prime Minister's vision "Make in India". The Government had asked e-commerce entities to adhere to the Packaged Commodity Rules and display Country of Origin of products listed on their platform/s by August 01, 2020. In the recently draft of proposed amendment to the Consumer Protection (E-Commerce) Rules, 2020, inter alia, requires and e-commerce entity that offers imported goods or services for sale, to identify goods based on their country of origin, provide a filter mechanism on their e-commerce website and display notification regarding the origin of goods at the pre-purchase stage, at the time of goods being viewed for purchase, suggestions of alternatives to ensure a fair opportunity for domestic goods and further to provide ranking for goods and ensure that the ranking parameters do not discriminate against domestic goods and seller.

Legislations relating to sale of goods

The Sale of Goods Act, 1930 (the “Sale of Goods Act”)

Sale of Goods Act governs contracts relating to sale of goods. The contracts for sale of goods are subject to the general principles of the law relating to contracts i.e., the Indian Contract Act, 1872. A contract for sale of goods has, however, certain peculiar features such as, transfer of ownership of the goods, delivery of goods, rights and duties of the buyer and seller, remedies for breach of contract, conditions and warranties implied under a contract for sale of goods, etc. which are the subject matter of the provision of the Sale of Goods Act.

Producers of such e-waste also have extensive responsibilities and obligations and may come under the scrutiny of either the central pollution control board or the state pollution control board. The manufacturer, producer, importer, transporter, refurbisher, dismantler and recycler shall be liable for all damages caused to the environment or a third party due to improper handling and management of thee-waste and may have to pay financial penalties as levied for any violation of the provisions under these rules by the state pollution control board with the prior approval of the central pollution control board.

The Copyright Act, 1957 (“Copyright Act”) and the Copyright Rules, 2013, issued under the Copyright Act, (“Copyright Rules”), protect literary and dramatic works, musical works, artistic works including photographs and audio-visual works (cinematograph films and video). While copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration constitutes prima facie evidence of the particulars entered therein and may expedite infringement proceedings and reduce delay

caused due to evidentiary considerations. The Copyright Rules lay down the procedure for registration of copyright, including artistic, musical and literary works. The Trade Marks Act, 1999 (“Trade Marks Act”) provides for application and registration of trademarks in India. It also provides for exclusive rights to marks such as brand, label, and heading; and to obtain relief in case of infringement for commercial purposes as a trade description. The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are evaluated regularly by the executive Management in deciding how to allocate resources and in assessing performance. However the company is currently dealing in only one primary segment.

2.18 Taxes on income

"Tax expense comprises current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with Income Tax Act, 1961. Deferred income tax reflects the impact of current year timing differences between taxable income that originates in one period and are capable of reversal in one or more subsequent periods

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability. "

2.19 Impairment of assets

The carrying values of assets / cash generating units are reviewed at each Balance Sheet date for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss.

2.20 Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

A contingent liability is disclosed where, as a result of past events, there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.21 Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

2.22 Lease

a) Finance lease

i) Assets taken on finance lease are capitalised at fair value or net present value of the minimum lease payments, whichever is less.

ii) Lease payments are apportioned between the finance charges and outstanding liability in respect of assets taken on lease.

b) Operating lease

i) Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term are classified as operating lease. Lease rent are recognized as an expense in the Statement of Profit and Loss on a straight line basis over the lease term.

2.23 Earning per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

2.24 Impairment of Assets

Impairment of assets if any, is ordinarily assessed by comparing recoverable value of individual assets with its carrying cost.

2.25 Discontinuing Operations

A discontinuing operation is a component of an enterprise: (a) that the enterprise, pursuant to a single plan, is: (i) disposing of substantially in its entirety, such as by selling the component in a single transaction or by demerger or spin-off of ownership of the component to the enterprise's shareholders; or (ii) disposing of piecemeal, such as by selling off the component's assets and settling its liabilities individually; or (iii) terminating through abandonment; and (b) that represents a separate major line of business or geographical area of operations; and (c) that can be distinguished operationally and for financial reporting purposes. However, the company doesn't have any discontinued operation.

(BASED ON RESTATED FINANCIAL STATEMENTS)**

Total Revenues

Particulars	<i>(amount in lakhs)</i>		
	March 31, 2023	March 31, 2022	%age Change
Mobile Phones	12,360.88	8,278.90	49.31%
Smart Hearables & Wearables	5,929.10	1,577.92	275.75%
Accessories	5,314.87	2,272.16	133.91%
Appliances	2,830.35	0	NA
Other Income	1.36	0	NA
Total	26,436.56	12,128.98	117.95%

The company's operations for FY 2020-21 resulted in nil revenue, making a comparison feasible only for FY 2022 and FY 2023. It's pertinent to mention that in FY 2022-23, the company acquired the running business of Unity Communications, previously a sole proprietorship owned by Mr. Ravi Aggarwal. This acquisition significantly contributed to the substantial increase in revenue. All previous invoices, which used to be raised under the proprietorship, were now issued by the company. As a result, there was a remarkable overall revenue jump of approximately 118%. Moreover, with increasing awareness among rural and semi-urban young generation for quality products at affordable prices and increase in their spending power, availability of mobile data at affordable rates, the company experienced exceptional growth in sales for smart hearables, wearables, and accessories, with an increase of 275% and 134%, respectively. Additionally, the introduction of a new division selling appliances also contributed to the revenue surge. Therefore, considering these factors, the increase in revenue can be attributed to the mentioned points.

Total Expenditure

Table 1: Total Expenses

Particulars	<i>(amount in lakhs)</i>		
	FY 2023	FY 2022	%age Change
Cost of Goods Sold	20,880.77	10,457.77	99.67%
Employee benefit expense	1,048.15	667.23	57.09%
Financial costs	182.03	0	NA

Depreciation and amortization expense	45.62	1.94	2,256.76%
Other expenses	3,218.59	703.31	357.63%
Total Expenses	25,375.16	11,830.25	114.49%

Table 2: Total Expenses as %age of Total Revenue

Particulars	FY 2023	FY 2022	%age Change
Cost of Goods Sold	78.99%	86.22%	(7.23%)
Employee benefit expense	3.96%	5.50%	(1.54%)
Financial costs	0.69%	0.00%	0.69%
Depreciation and amortization expense	0.17%	0.02%	0.16%
Other expenses	12.18%	5.80%	6.38%
Total Expenses	95.99%	97.54%	(1.54%)

In FY 2022-23, total expenses increased by 114.49% compared to FY 2021-22. However, this increase is actually lower than the increase in total revenues, which saw a growth of approximately 118%. It appears that while overall expenses went up, they increased at a lower percentage rate than the corresponding increase in revenues.

Looking at Table 2, it becomes evident that the overall expenses as a percentage of total revenue have decreased by 1.55%. This positive trend is likely to have a favorable impact on profitability, leading to an increase in profits.

Breaking down the broad parameters, the cost of goods sold increased by 99.67% in value, but it decreased by 7.23% as a percentage of total revenue. Similarly, employee benefit costs rose by 57.09% in value but reduced by 1.54% as a percentage of total revenue. Furthermore, other expenses increased by 357.63% in value and 6.38% as a percentage of total revenue.

Profit after Tax

Particulars	<i>(amount in lakhs)</i>		
	March 31, 2023	March 31, 2022	March 31, 2021
Profit for the year	797.07	213.56	-2.42
PAT Margin	3.02%	1.76%	0.00%
%age Change in PAT	273.23%	0.00%	0.00%

The PAT Margin has shown a marginal increase from 1.76% in FY 2021-22 to 3.02% in FY 2022-23. This improvement can be attributed to the slight decrease in total expenses during the same period. The increase in PAT Margin indicates that the company has effectively managed its expenses, leading to better profitability and financial performance.

Phased implementation of unified payments interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six (6) Working Days.
- b. Phase II: This phase commenced on completion of Phase I i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II

has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Bidder through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

- c. Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed Yes Bank Limited as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to Rs. 5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than Rs. 200,000 and up to Rs. 5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
